Skills

Profile

Highly motivated Associate Software Engineer with a solid foundation in JavaScript and React.js, backed by a BS in Computer Science. Proficient in front-end development, with expertise in HTML, CSS/Tailwind CSS, and problem-solving. Skilled in optimizing ReactJS using Redux, Redux Toolkit, React Router, and Hooks. Adept at collaborating within a team and independently, with a strong focus on continuous learning and staying abreast of industry trends. Eager to apply my knowledge and enthusiasm to dynamic projects, while thriving in a fast-paced development setting.

Employment History

Associate Software Engineer, Southville Solutions, Lahore

JUNE 2024 – PRESENT

I learned about how Javascript works under the hood, focusing on core concepts, and developed an assessment project in JavaScript. I also explored the power of ReactJS, understanding its nature and how it operates, and learned how to optimize it using packages like Redux, Redux Toolkit, React Router, and Hooks. Additionally, I completed several assessment projects in React, as it was my main technology stack.

Projects

Rapid Repair (Final Year Project)

I worked on the development of a hybrid application using React.JS for the web and React Native for mobile as part of my Final Year Project (FYP). The project was built using the MERN stack and acts as a middleware between trained household technicians and clients who require repair services. I was responsible for developing the frontend with ReactS, while the backend was implemented using Node.js.

Education

BS Computer Science, NFC Institute of Engineering and Fertilizer Research, Faisalabad

OCTOBER 2019 – OCTOBER 2023
